

## Case Study: Baker Tilly, Guildford

Carbon Credentials is the outsourced energy manager for the Guildford branch of Baker Tilly, a leading mid-tier accountancy firm in the UK.

In early 2009 Carbon Credentials completed a Free Energy Audit, identifying initial savings of 21% and clarifying key energy compliance imperatives.

Impressed with these results, Baker Tilly, Guildford commissioned a Full Energy Survey, in which the company building and its previous year's energy bills were thoroughly examined.

Carbon Credentials were pleased to report a combined saving of 46% of the annual energy bill and were able to acquire an energy tariff 9% cheaper than the best rates offered by the incumbent tariff negotiators.

As a mark of this success Carbon Credentials has been retained by Baker Tilly, Guildford under a three year contract and is looking after 15 energy-related projects and all compliance issues.

An added bonus, noted by staff, is the improved quality of the atmosphere in the building. The building itself is being future-proofed against increases in annual energy prices.

***"As an accountant and graduate mechanical engineer I understand the principles involved in improving energy savings and complying with government legislation, but I don't have the time to deal with these myself. That's why I needed a trusted partner at the forefront of cutting edge technology to take care of it all for me. Carbon Credentials continues to manage all aspects of the process smoothly in a way that delivers excellent results."***
