

How Carbon Credentials works for you...

»» The Free Energy Audit

1

Free on-site energy audit lasting approximately an hour. The main objective of this audit is to produce a written report that:

- a) Identifies what level of energy savings are possible
- b) Clarifies if you have any urgent energy legislation compliance requirements

We will then deliver this report in person and discuss the findings with you.

»» Full Energy Survey

2

A number of days on site and detailed desk-based studies of your overall energy usage. We produce a report which:

- »» Details areas of energy waste and associated possible energy-efficiency savings
- »» Outlines the technical solutions
- »» Quantifies the capital expenditure (if any) and return on investment for each project
- »» Identifies what grants and loans are available for you

Note: If your company decides to engage us for the Energy Management Programme, the price of the Full Energy Survey will be taken off your first year's fee.

»» Urgent Compliance

For example you may need to:

- »» Commission an air conditioning inspection
- »» Report energy usage for the Carbon Reduction Commitment
- »» Complete an Energy Performance Certificate or Display Energy Certificate

»» Instant Savings

For example you may be able to save money immediately through:

- »» Tariff negotiations
- »» Climate Change Levy (CCL) rebates

»» Energy Management Programme

3

Our gold standard, where you outsource your energy management needs to us, both cost-savings projects and compliance projects. This would normally incorporate multiple projects, usually over a 3 year period. We can work with you in a number of ways for example:

- »» Annual fee, billed monthly or quarterly
- »» Success fee (% of achieved savings) based on agreed projects and savings

»» Individual Projects

We can work with you on a project by project basis and either assist with:

- »» Feasibility studies and project plans for you to manage the projects in house
- »» Carbon Credentials-managed projects, for example, building efficiency projects, electrical projects, heating or air con projects, grant and loan acquiring assistance
