Dear Richard

CRC Audit Reference

Thank for your support and professionalism in delivering the first stage of our CRC internal audit and at such short notice.

It really helped clarify where we should be and I feel a lot more confident that the information we have submitted is as it should be.

Cian and Paul were able to point out opportunities and came back to me within the day on a point of clarification.

I think for the first year of operation it is vital to get your systems in place and, despite attending courses and reading all guidance the EA published, it is clear that I am a lot closer to achieving that now.

Yours

Leah Rumble
Energy and Environmental Manager
